Education

University of South Florida
Bachelor of Science, Computer Science

Dec 2027
GPA: 3.6

Skills

Languages: Python, JavaScript, C++, SQL, HTML/CSS
Frameworks/Libraries: React, FastAPI, Express, Supabase, Tailwind CSS
Developer Tools: Git, GitHub, Vercel, Docker, Postman
Core Concepts: Data Structures, Algorithms, REST APIs, Full-Stack Development, Database Design

Projects

NoteLink | JavaScript, Supabase, SQL, Vercel, VirusTotal | <https://notelink-seven.vercel.app>

- Built a class-organized academic resource platform with search, pagination, and structured browsing by school, professor, and course.
- Implemented a server-validated upload workflow using Supabase quarantine/public storage and uploader-level ownership controls.
- Added a malware-scanning pipeline (VirusTotal) before public file release to improve platform safety and content quality.

Ava AI Assistant | Python, FastAPI, React, Vite, OpenAI API, Vercel | <https://ava-ai-assistant.vercel.app>

- Built a full-stack AI assistant that answers recruiter/collaborator questions using a curated resume knowledge base and conversation-aware responses.
- Implemented a lightweight retrieval layer (BM25-style chunk ranking) to ground model outputs in project/experience context and reduce hallucinations.
- Developed production-ready backend APIs with request validation, bounded chat history handling, response caching, and configurable model/CORS settings for reliable deployment.

BuddyBot 2.0 | JavaScript, Node.js, Mineflayer, OpenAI | [Demo Link](#)

- Engineered an AI-powered Minecraft bot that responds to natural-language player input, chat commands and executes modular in-game behaviors.
- Integrated OpenAI dialogue generation with event-driven bot control, and command lifecycle handling.
- Structured the codebase into reusable behavior modules to support extensibility and rapid feature iteration.

Experience

Handshake AI
AI Trainer

Remote
Nov 2025 – Present

- Evaluated multimodal AI outputs across text, image, audio, and video tasks for prompt adherence, quality, realism, safety, and content preservation.
- Annotated and reviewed data for transcription, image labeling, and side-by-side model evaluation, documenting decisions and edge cases with clear written rationales.
- Created synthetic chat interactions and reverse-engineered prompts to support AI training workflows.

Infotect Design Solutions
IT Operations Intern → IT Operations Specialist

Tampa, Florida
Jul 2023 – Mar 2024

- Served as first point of contact during shifts; created, triaged, prioritized, and dispatched 100+ tickets/week, coordinating follow-ups and escalations through resolution.
- Built Excel-based KPI and trend reports to track technician productivity and ticket throughput, delivering daily status updates to management.
- Created a standardized CRM client quick-reference template and populated 50+ client records to streamline call intake and technician handoffs.
