EDUCATION

University of South Florida

Dec 2027

Bachelor of Science in Computer Science

GPA: 3.61 / 4.00

Coursework: Data Structures, Discrete Structures, Computer Organization, Linear Systems, Calculus I-II

TECHNICAL SKILLS

Languages: Python, JavaScript, C++, SQL, HTML/CSS

Frameworks & Data: FastAPI, React, Node.js, Express, Supabase, PostgreSQL, Tailwind CSS

Engineering: Git, GitHub Actions, Docker, Vercel, Postman, REST APIs, BM25 retrieval, unit testing, Vercel Edge Functions

EXPERIENCE

Mercor | Generalist Expert (Contractor)

May 2026 - Present

- Evaluate AI-generated presentation and design outputs against detailed rubrics for content quality, visual hierarchy, template adherence, organization, and overall effectiveness.
- Rank multi-output design sets and write evidence-based rationales identifying guideline mismatches, ambiguity, and specific quality failures for human-feedback AI training.

Handshake AI | AI Fellow (AI Evaluation Specialist)

Nov 2025 - Present

- Evaluate multimodal AI outputs across text, image, audio, and video for prompt adherence, realism, safety, quality, and content preservation.
- Compare model outputs and write decision rationales for training and evaluation data, including transcription, image labeling, synthetic dialogue, and prompt reconstruction.

Infotect Design Solutions | Assistant Operations Specialist (IT Operations)

Jul 2023 - Mar 2024

- Promoted from operations intern; triaged, prioritized, and dispatched 100+ support tickets per week while coordinating follow-ups and escalations.
- Built Excel KPI and trend reports plus a standardized CRM reference populated for 50+ client records, improving technician handoffs and management visibility.

PROJECTS

Ava AI Assistant | Python, FastAPI, React, OpenAI API

[Demo](#)

- Built and deployed a React/FastAPI assistant that grounds OpenAI responses in a curated resume knowledge base using an in-memory BM25-style retriever.
- Added Pydantic validation, bounded chat context, TTL response caching, health/readiness endpoints, six passing retrieval tests, and GitHub Actions CI.

NoteLink | JavaScript, Supabase, PostgreSQL, VirusTotal

[Demo](#)

- Built an invite-gated academic resource platform with live search suggestions, multi-field filtering, pagination, likes, and Supabase/PostgreSQL persistence.
- Implemented a quarantine-first upload pipeline that validates metadata and file size, hashes and scans files with VirusTotal, and promotes only clean files.

BuddyBot 2.0 | JavaScript, Node.js, Mineflayer, OpenAI

[Demo](#)

- Built a Node.js/Mineflayer Minecraft agent with chat-controlled spawn/despawn, dynamic player following, combat assist, inventory summaries, and OpenAI-generated responses.
- Separated AI, infrastructure, and game-control modules; added bounded memory, cooldown controls, safe shutdown, 11 passing tests, CI, and automated dependency auditing.
